As a Software Engineer, I am dedicated to collaborating with cross-functional teams to build functional and user-centric digital experiences. With a growing proficiency in front-end languages and frameworks, I constantly update my skills and keep up-to-date with emerging technologies to build my skill set. I am passionate about problem-solving and committed to building innovative software solutions that meet business needs and elevate user experiences.

TECHNICAL SKILLS

HTML, CSS, JavaScript, React.js, Ruby, Rails,

TECHNICAL PROJECTS

Rudy | [GitHub](#) | [Demo](#)

A design system developed to facilitate the usage of reusable components for novice developers.

- Built with a React front-end and CSS styling.
- Adapted functioning log-in/log-out features using Ruby and Rails.
- Assembled with HTML and CSS code that can be easily reused in other projects.
- Implemented and established rules and best practices for design system usage.

Optical Lie | [GitHub](#)

An interactive website that showcases optical illusions through an intuitive and fun interface.

- Built with a React front-end and CSS styling.
- Utilized a Ruby backend to manage login and logout functionality.

Snake Pit | [GitHub](#)

A modern interpretation of the classic 1970s video game "Snake".

- Built with a React front-end and CSS styling.
- Curated music to enhance the gameplay experience.
- Utilized a local API to store and display scores after each play.
