Software Engineer

I am a FlatIron School graduate with expertise in full stack programming and a strong focus on front end development. I excel in high-pressure, high-volume production environments and thrive in team-based settings where collaboration and problem-solving are essential. Continuously enhancing my proficiency in frontend software languages, I enjoy creating a diverse portfolio of projects that showcase my unique style and passion for engineering.

TECHNICAL SKILLS

HTML, CSS, JavaScript, React.js, Ruby, Rails,

TECHNICAL PROJECTS

Rudy | GitHub | Demo
- Rudy is a fully functional design system, consisting of buttons, toggles, sliders, and color grids.
  - Built with a React front end that was styled using CSS.
  - Uses a functioning log-in / log-out with Ruby & Rails.
  - All components have HTML and CSS code that can be copied and used in other projects.
  - Rules and best practices for using the design system.

Optical Lie | GitHub | Demo
- Optical Lie is an interactive way of exploring optical illusions.
  - Built with a React front end and styled with CSS.
  - Used a Ruby backend to handle long-in and log-out
  - Continually updating the illusion content.

Snake Pit | GitHub | Demo
- Snake Pit is a take on the traditional video game snake.
  - Built with a react front end and styled with pure CSS.
  - Added music to enhance the playing experience.
  - Utilizes a local api that stores your score and entails after each play.

EXPERIENCE

Danger Press   Atlanta, GA
Lead Press Operator   03/2019 - 08/2022
  - Screen printed large quantities of textile garments (t-shirts, hoodies, etc).
  - Maintaining a clear and collected mindset in a high stress and competitive environment.
  - Able to communicate clearly and pragmatically.

EDUCATION

Codecademy   On-line
Full Stack Web Development programing bootcamp.   02 / 2023 - 04 / 2023

Flatiron School   Manhattan, NY
Full Stack Web Development programing bootcamp.   10 / 2022 - 01 / 2023

Augusta Technical College   Augusta, GA
Computer Programming.   2000
